## Machinery We Use

---

# Horizontal centrifugal casting machine

---

# Induction furnace

---

Pee's induction furnace/100kilowatt with 100kg crucible, 200 kilowatt with 200kg and 300kg crucible

# Thryistor welding machine

---

# Plasma cutting machine

---

# Non-contact pyrometer

---

# Weighing machine

---

# Aircompressor

---

# Eot Crane

---

# Testing & Analysis - Spectrometer

---

# Our Heating Process

---

Annealing

Normalizing

Hardening

Quenching

# Our Production Capabilities

## Length

From 300MM TO Maximum length of 1000mm

## Weight

From 15kgs-250kg per TUBE

## PRODUCTION CAPACITY

80 Tones per month

## DIAMETER

From 70mm-430mm

## Products we Developed

# Centrifugal Casting products we developed

---

# Our Clients
